

LEAN DATA MANAGEMENT

FOR ENVIRONMENTAL, SOCIAL
AND GOVERNANCE (ESG)

Powered by RIMES Managed Data Services

ESG IS A **DATA MANAGEMENT PROBLEM**

The sustainable investment industry has developed rapidly with limited market infrastructure, severely impacting the quality and availability of environmental, social and governance (ESG) data. With no global standardized ESG disclosure requirements for issuers today, Investment Managers struggle to get the transparency they need to pinpoint truly sustainable assets. As new sources come to market and regulatory scrutiny intensifies, firms are exposed to more and more risk.

Investment Managers operating in this sector must get their data foundation in place to ensure they can stay on the right side of regulators and outperform competitors.

SOLVE THE PROBLEM **WITH RIMES**

Get high quality ESG data to confidently evaluate the sustainable credentials of any asset.

RIMES provides firms with consistent, reliable high quality ESG data, delivered on time and in a format users can compare and generate insights from.

Unlike tech-led solutions, RIMES' fully managed service model and **lean approach** future-proof ESG data management, proactively pushing well-governed, fit-for-purpose data for enterprise-wide use.

BENEFITS OF RIMES' LEAN DATA MANAGEMENT (Learn more | p. 5)

- Enhanced data quality for insights
- Greater operational efficiencies
- Better resource allocation
- Faster time to market and time to quality

END-TO-END SERVICE ACROSS THE ESG ECOSYSTEM

ACTIONABLE ESG DATA FOR ENTERPRISE-WIDE USE

OPERATIONS

Deliver timely, high quality ESG data configured for any user or system requirements across the enterprise

DISTRIBUTION

Generate disclosures in line with any client and regulatory reporting requirements

RISK & COMPLIANCE

Ensure compliance with all regulatory requirements

INVESTMENTS

Evaluate the sustainable credentials of assets efficiently

CORPORATE FUNCTIONS

Fulfil your corporate ESG disclosures

THE VALUE OF A FULLY MANAGED SERVICE

Accelerate all workflows with RIMES' data management services. A consumption-based fee structure means clients subscribe to only what they use. Easily modify as needs change.

THE DATA INSIGHTS ICEBERG

The underlying workflow to produce quality data for analysis is tech- and resource-intensive, further complicated by constant change.

- Real-time service oversight
- Suite of desktop and analytical tools to support discovery and insights

INTERACTION & ANALYTICS

Shift the data management burden to RIMES

DELIVERY

- Data shaped to any system/schema needs, REST API pull, or push to cloud/data lake

MASTERING & MANAGEMENT

- Implementation of client-specific scoring policy and/or mandatory disclosure frameworks

VALIDATION & CROSS-REFERENCING

- Data lineage, oversight, and governance
- Cross-referencing across sources and entity mapping

SOURCING

- Industry's most comprehensive library across ESG ratings, scores and fundamental content
- Embedded vendor management

CLIENT SERVICE

- Expert advisory on best practices in data strategy & management
- Front-run-the-sun service model and 24/7 support from global data team

ABOUT LEAN DATA MANAGEMENT FOR ESG

A BETTER WAY TO ENRICH ENVIRONMENTAL, SOCIAL AND GOVERNANCE DATA FOR ENTERPRISE-WIDE USE.

Deliver continuous improvements across the ESG ecosystem with RIMES' proprietary lean approach to data management. A flexible, cloud-based service, RIMES manages data at scale for 350 global clients, helping firms lower total cost of ownership while dramatically enhancing data quality, operational efficiency and adaptability.

THE PRINCIPLES OF LEAN DATA MANAGEMENT

IMPROVE BUSINESS OUTCOMES

Deliver trusted, timely, accurate and complete ESG data seamlessly across your enterprise. Free up capacity to generate data insights that drive growth and differentiation.

ELIMINATE WASTE

Embed a proven service model that solves the complex operational data management problem efficiently without the need for additional people or technology investment.

ENHANCE ADAPTABILITY
